

2023 Texas Section Society for Range Management Annual Meeting

Energy, Fire, and Water: Impacts on Texas Rangelands

October 18th-20st, 2023

Bastrop Convention and Exhibit Center

1408 Chestnut St B, Bastrop, TX 78602

Howdy Rangers. October is fast approaching, and the Texas Section Society for Range Management (TSSRM) is ramping up planning efforts for our annual meeting in Bastrop. Our theme this year is three-fold and each topic could easily headline a meeting. The inclusion of all three should certainly stimulate lively discussion. Energy development, be it from petroleum or renewable sources, is increasing its footprint in the state and affecting more of our management and restoration activities every day. Fire, wild or prescribed, either has, does, or will affect us at some point. The importance of water is also obvious and, in this meeting, we will focus on surface water, especially rivers and how they helped write the history of Texas. They will likely have a say in the future as well.

Thus, this annual meeting is shaping up to be a unique one for the section. Situated right on the Colorado River in the Lost Pines with Bastrop State Park and McKinney Roughs Nature Park (Lower Colorado River Authority) within striking distance, and not far from Austin where policy that affects all of us in the range profession is crafted, Bastrop should provide an outstanding learning and networking opportunity. We are reaching out to an accomplished set of speakers and will have a program to release soon. Tied into the meeting as always will be those challenging opportunities for our students through the Plant ID Contest, Undergraduate Range Management Exam, 3MT competitions and our Don Pendleton graduate research paper competition.

If you are interested in sponsoring this meeting or obtaining booth space to exhibit your product to TSSRM members and other interested individuals from across the state, please register online at <https://texassrm.org/sponsorship>. The deadline to register is **September 27, 2023**, but we have limited spaces available and expect to fill them quickly. Our annual meetings have drawn 250-275 participants in the past. Last year was our first in-person meeting post-Covid and we had **200 registered**? We feel Bastrop is an attractive central location and the theme will be a great draw. So we are looking forward to increased attendance this year. Please review the enclosed exhibitor packet as you make your decision. If you have any questions regarding the meeting or tradeshow, feel free to contact me at (325) 226-6167, or douglas.tolleson@ag.tamu.edu. I am often out in the field and away from cell contact so other contacts include **mmmmmmmmmm**. Thank you for your consideration, and we look forward to partnering with you.

Sincerely,

Doug Tolleson
